TUFF  **BOXX**
ANIMAL RESISTANT STORAGE SOLUTIONS

WHAT MAKES A TUFFBOXX...

Proudly designed and manufactured in Canada by the company that makes Paris Site Furnishings and Outdoor Fitness Equipment. TuffBoxx is your go-to choice for animal resistant secure storage solutions, for garbage bins for homes, cottages, and businesses; public waste receptacles; sports field equipment; deck, dock, or beach equipment; equestrian tack; agricultural feed; and many other uses.

TuffBoxx Features:

- All galvanized steel construction for strength and rust resistance
- Gas shocks on the lids of the Bruin, Grizzly, Kodiak, Kit, DockBoxx, and Broot models for safe and easy lid control
- Lockable lids and doors
- Textured powder coat paint for great looks and durability
- Rigorous testing, including bins being tested with grizzly and polar bears

BRUIN

The Bruin is your versatile storage solution. Ideal for protecting:

- Firewood
- Pool Equipment & Chemicals
- Outdoor Furniture
- Sports Field Equipment
- Garbage (Holds 4 Bags)

SMART, COMPACT DESIGN AND QUICK ASSEMBLY.

Weight: 145 lbs

Size: 35" Wide
27" Deep
33" High

Inside: 32" Wide
24" Deep
30" High

OUR SMALLEST TUFFBOXX MODEL, BUT DON'T LET THE SIZE FOOL YOU

A top loading compact bin with the capacity to easily store your firewood or pool equipment for safe, secure storage.

When used for garbage, TuffBoxxes are suitable for curbside collection or intermediate storage until taken to your municipal waste management centre. All TuffBoxx residential containers are made in a ready to assemble design, and the bins can be shipped unassembled in boxes, or assembled on a pallet.

The base version outmuscles those small critters like raccoons, squirrels, rats, and smaller black bears. To meet the requirements of being a Certified Bear Resistant bin, you will need to add the Bear Guard brackets, which prevent bears from being able to grab the lids and potentially bend them.

Available Colours:

GRIZZLY

The Grizzly is your versatile storage solution. Ideal for protecting:

- Firewood
- Pool Equipment & Chemicals
- Outdoor Furniture
- Sports Field Equipment
- Garbage (Holds 6 Bags)

SMART, INNOVATIVE DESIGN AND QUICK ASSEMBLY.

Weight: 190 lbs
Size: 51" Wide
27" Deep
33" High
Inside: 48" Wide
24" Deep
30" High

THE GRIZZLY IS OUR MOST POPULAR SIZED TUFFBOXX

The bin is large enough to hold sports field equipment, firewood or wood pellets, pool equipment, equestrian tack, feed, or even emergency equipment and supplies. With its lockable top loading lid, your important possessions will be securely stored.

When used to store garbage, TuffBoxxes are suitable for curbside collection or for intermediate storage of garbage until taken to your municipal waste management center. All TuffBoxx residential containers are made in a ready to assemble design, and the bins can be shipped unassembled in boxes, or assembled on a pallet.

The base version Grizzly is easily strong enough to keep out the smaller critters like raccoons, squirrels, and rats, and will give great results with smaller black bears. To meet the requirements of being a Certified Bear Resistant bin you will need to add the Bear Guard brackets, which prevent bears from being able to grab the lids and potentially bend them.

Available Colours:

THE KODIAK IS OUR LARGEST TUFFBOXX RESIDENTIAL MODEL

The bin is large enough to hold an entire baseball team's equipment, a good stash of firewood or wood pellets, equestrian tack, campground food storage, or emergency equipment and supplies. The Kodiak is also suitable for small businesses, baseball diamonds, multi-unit apartments, group homes, and small restaurants.

When used to store garbage, TuffBoxxes are suitable for curbside collection or for intermediate storage of garbage until taken to your municipal waste management center. All residential TuffBoxx containers are made in a ready to assemble design, and the bins can be shipped unassembled in boxes, or assembled on a pallet.

The Kodiak can be securely mounted to a concrete pad or other solid base with the mounting system that is built into the bottom of the bin's base. It can also be secured with a chain (up to 1/4") or cable to a tree or other secure post. With its strong durable construction, the Kodiak bin provides some of the strongest protection money can buy.

Available Colours:

* With Optional Slam Latch Lid

KODIAK

The Kodiak is your versatile storage solution. Ideal for protecting:

- Firewood
- Pool Equipment & Chemicals
- Outdoor Furniture
- Sports Field Equipment
- Garbage (Holds 8 Bags)

SPACIOUS DESIGN AND INCREDIBLE STRENGTH.

Weight: 230 lbs

Size: 63" Wide
27" Deep
33" High

Inside: 60" Wide
24" Deep
30" High

IT MAY BE SLIM, BUT THE KIT PACKS POWER

Perfect for lighter duty residential use, the Kit is large enough for patio seat cushions, firewood, pool equipment and toys, and waste containers. The Kit comes equipped with a lockable top loading lid that will store and protect your important possessions.

When used to store garbage, TuffBoxxes are suitable for curbside collection or for intermediate storage of garbage until taken to your municipal waste management center. All TuffBoxx containers are made in a ready to assemble design, and the bins are shipped unassembled in boxes.

The Kit's strength protects it from smaller critters like raccoons, squirrels, and rats (not recommended for bears). This bin is the most economical container in the TuffBoxx lineup. The Kit will securely hold the contents you wish to store in residential areas.

Available Colours:

KIT

The Kit is your versatile storage solution. Ideal for protecting:

- Firewood
- Pool Equipment & Chemicals
- Outdoor Furniture
- Sports Field Equipment
- Garbage (Holds 6 Bags)

**SMART, ECONOMICAL,
AND QUICK ASSEMBLY.**

Weight: 144 lbs

Size: 47" Wide
27" Deep
32" High

Inside: 43" Wide
24" Deep
30" High

DOCKBOXX

No dock should be without a DockBoxx. Ideal storage solution for:

- Boat Oars and Paddles
- Lifejackets
- Fishing Gear
- First Aid Kit
- Water Toys

**SMART, ECONOMICAL,
AND QUICK ASSEMBLY.**

Weight: 157 lbs
Size: 75" Wide
 27" Deep
 18" High
Inside: 72" Wide
 24" Deep
 16" High

THE DOCKBOXX IS YOUR SOLUTION FOR DOCK, DECK OR PATIO STORAGE

The DockBoxx is the ideal storage solution for your cottage dock, your deck or patio, for the pool, at the marina, or even on a large boat. The DockBoxx is crafted with 16GA and 12GA rust preventative galvanized steel, perfect for its environment. No more transporting your equipment from the cottage to the lake.

The DockBoxx is assembled in 20 minutes and has a very simple installation process, meaning you can spend more time on the lake. Expertly designed with lift assist gas shock cylinders, the DockBoxx is your ergonomic dockside storage solution. The DockBoxx has louvered front and back panels for air flow, as well as drain holes in the base to help keep contents in the bin dry.

Built with you in mind, the DockBoxx also doubles up as a seat. Lid holes enable the user to tie cushions on top of the box, transforming it into a bench, because having fun can be tiring. The DockBoxx is the perfect solution to securely storing your dockside equipment.

Available Colours:

* Optional Red/Charcoal Colour

SECURELY STORE LARGE POLYCART CONTAINERS OR OTHER OUTDOOR EQUIPMENT

The ToteBoxx is a front door access storage container that will hold 64 and 96 Gallon plastic polycarts or totes. The front door is lockable with a padlock or with a snap hook. Made with 16 Gauge galvanized steel, the ToteBoxx is stronger than most other metal sheds. The base of the ToteBoxx has a built in ramp to make it easier to roll in and out wheeled containers. The reinforced lid is sloped to rear of the container so water and snow will run away from the door.

The ToteBoxx is also well suited to many other secure storage uses, including Sports Field Equipment, Garbage and Recycling, Tools, Yard Equipment, Feed, and really anything else you would want to put inside.

TOTEBOXX

Can be used for Sports Field Equipment

- Lockable Front Door Access
- Built-in Ramp
- Can be Mounted or Secured with a Chain or Cable

EXCELLENT FOR INTERMEDIATE STORAGE OF GARBAGE BAGS.

Size: 42" Wide
48" Deep
56" High

Available Colours:

PICNIC

Accessibility compliant design and animal resistant.

INNOVATIVE AND SMART DESIGN.

Weight: 190 lbs

Size: 38" Wide
28" Deep
46" High

Inside: 35" Wide
24" Deep
34" High

THE **PICNIC** IS A SINGLE CHUTE, SINGLE DOOR WASTE RECEPTACLE

Made to be used with an inner container to hold the waste bag. The Picnic's mailbox style chute door is designed to be Accessibility Compliant. The chute door, with a simple finger release latch, closes and locks by gravity. Waste that is deposited is directed into the inner container to eliminate waste deflection. The 6" x 10" opening limits the size of the waste being disposed of to only "small trash" to prevent people from bringing their home trash to a park environment.

The Picnic can be used for garbage, recycling, organics, or even pet waste. Labeling can be supplied to identify the stream of waste that should be put into the receptacle.

The Picnic is strong enough for the largest of wildlife, including bears, and will easily keep out the smaller critters. What makes it stand out is being both accessible and animal resistant.

Available Colours:

CAMPER

Accessibility compliant design and animal resistant.

INNOVATIVE AND SMART DESIGN.

Weight: 280 lbs

Size: 57" Wide
28" Deep
46" High

Inside: 54" Wide
24" Deep
34" High

THE CAMPER IS A DOUBLE CHUTE, DOUBLE DOOR, WASTE RECEPTACLE

Made to be used with two inner containers to hold the waste bags, the Camper's mailbox style chutes are designed to be accessibility compliant. The chutes also limit the size of waste being disposed of to only "small trash," which discourages people from bringing their household trash to park environments.

The Camper can be used for two streams of garbage and/or recycling, and/or organics, or even pet waste. Labels can be supplied to identify the stream of waste that should be put into the receptacles.

The Camper is also available with a top lid system. While not accessibility compliant (the lids are still safe and easy to use) the bins are still animal resistant for even the largest of wildlife. The top lid system has round 10" diameter chute openings. Ask us about which version of the Camper is best suited to your requirements.

Available Colours:

* Optional Red/Charcoal Colour

THE **BROOT** IS OUR LARGEST MODEL WITH DOUBLE LIDS, AND DOUBLE DOORS

Think of it like a 2 cubic yard dumpster for manual pick-up of garbage. In many ways, it's like a larger version of our residential TuffBoxxes, and it will hold about 20 bags of garbage. The large front doors allow for easier manual removal of the garbage. The Broot can be used for campgrounds, small apartments, communal sharing by a group of property owners, small businesses, and for a variety of municipal purposes (fire departments, arenas and community centres).

Like its name suggests, the Broot is designed to be strong enough for the largest of wildlife (think grizzly and polar bears), and it will easily keep out smaller critters like raccoons, squirrels, and rats.

BROOT

Ideal storage solution for campgrounds, apartments and communal sharing.

OUR BIGGEST BIN. OFFERS BIG PROTECTION.

Weight: 470 lbs

Size: 57" Wide
42" Deep
49" High

Inside: 54" Wide
38.5" Deep
40" High

Available Colours:

SINGLE AND DUAL STREAM RECEPTACLES KEEP ALL **WILDLIFE** OUT OF THE GARBAGE IN PUBLIC SPACES

The TuffBoxx Trail models are animal resistant waste receptacles that are strong enough for the largest of wildlife, while being effective for the smallest critters. The Trail comes in Single and Double models to meet most of your outdoor space requirements. It uses a guarded, self-closing latch for the top lid, so you can count on it to be closed when the user has deposited their trash. Keeping it closed keeps both the wildlife and the elements out, and keeps your public environments clean and tidy. It has lockable rear door access for waste collection that is designed to be easy to use for the waste collector.

Trail receptacles are available in a number of colour options, and with labeling it can be easy to distinguish between the waste streams that are required at your property.

Available Colours:

TRAIL

Animal resistant
litter receptacles.

- Rust Resistant Galvanized Steel
- Self-Closing Weather Proof Lids
- Bear Resistant Latches

12" Deep
22" High

SECURE PARCEL DELIVERY BOX FOR HOME OR BUSINESS

The ParcelBoxx Delivery Box is a secure way to accept packages delivered to your home when you are not in. These tough units give you the freedom to leave the house and continue with your day knowing your deliveries will be made safely and securely to your home. This heavy-duty parcel box is made from weatherproof, galvanized steel and is fitted with a tough locking system, keeping your items safe, secure and dry. The easy to use ParcelBoxx can be bolted to the ground or fixed to the wall and is left empty and unlocked ready to accept your mail and parcel deliveries. The courier simply lifts the lid of the box and places the parcel inside, closes the lid and locks the lock, safely securing the parcel inside the box until you return home. The ParcelBoxx works well with BoxLock (not included). BoxLock is the first padlock designed for parcel deliveries. BoxLock automatically collects tracking numbers for the items delivered to your ParcelBoxx and sends them to your phone with the BoxLock App.

Available Colours:

BEAR GUARD FULL SIDES

Bolt on brackets that keep the TuffBoxx lid from being grabbed from any spot where a large bear could have leverage on the lid. These brackets are what make a TuffBoxx certified as Grizzly Bear Resistant, and were used when tested with polar bears. Should be used to get best results with larger black, grizzly, kodiak, and polar bears. Charcoal colour only. For Bruin, Grizzly, and Kodiak models.

BEAR GUARD FRONT CORNERS

Brackets bolt on front corners of the TuffBoxx to keep the lid's front corners from being grabbed by wildlife. To be used with small to mid-sized black bears. Charcoal colour only. For Bruin, Grizzly, and Kodiak models.

HINGE FLAG ASSEMBLY

Use this on your TuffBoxx to notify waste collectors that there is garbage and/or recycling items in your bin for pick-up. The hinge is stainless steel, and can be mounted anywhere on the bin. The top hinge flips open to reveal "Garbage" on a yellow or red background, or "Recycling" on blue. The hinge stays open with magnets. Flip down when bin is empty.

Available Colours:

SNAP HOOK ASSEMBLY

This snap hook is to clip through the lock catch when the lid is closed to prevent the lids from being opened. The cable is to secure the snap hook to the bin so it doesn't get lost. The snap hook should be used in bear country to securely keep the lid closed, yet is easily accessible for the waste collector to open up to remove waste from your TuffBoxx. Can be used on Bruin, Grizzly, Kit, Kodiak, DockBoxx, ToteBoxx and Broot models.

FREQUENTLY ASKED QUESTIONS

Q: Is TuffBoxx Bear Proof?

A: We are often asked if TuffBoxx is bear proof. TuffBoxx has been tested by both grizzly and polar bears (you can see videos of this testing on our website, or by searching TuffBoxx on YouTube). Our Grizzly model has been certified as "Grizzly Bear Resistant" when used with the Full Side Bear Guard Brackets and Snap Hook Assembly.

Q: How Should I Clean my TuffBoxx?

A: If it's road salt, or other corrosive elements, you should clean your TuffBoxx much like the way you would wash your car. Use soapy water or a car wash solution and wash your bin in the spring after the road salt season, and rinse after cleaning. If it's just typical garbage that may have spilled, wash the inside of the bin with soapy water and rinse with a hose (there are drain holes in the base for rinsing).

Q: Will my TuffBoxx Rust?

A: TuffBoxx is made with galvanized steel that is intended to stand up to the elements better than any other animal resistant product available. While very durable, to prevent rust it is recommended to keep your TuffBoxx clean, especially if it is near places where road salt is used. If kept washed and cleaned, or away from salt or other corrosive elements, there is no reason why a TuffBoxx shouldn't stay rust free for many years of service.

Q: What is the TuffBoxx Warranty?

A: TuffBoxx has a limited three year warranty that covers any manufacturing defects. While TuffBoxx has a premium powder coated finish over its all galvanized steel construction, the warranty doesn't apply to issues connected to rust and corrosion that are caused by neglect due to improper cleaning where there is excessive road salt or other corrosive elements. Our goal is to have customers that are delighted

with their TuffBoxx. Please call us at: **844-426-5553** or e-mail: support@usetuffboxx.com for any warranty issues.

Q: Should I Mount my TuffBoxx to a Concrete Pad?

A: We recommend securing TuffBoxxes used for bears to a concrete pad or other solid base to get the best results. The Bruin, Grizzly, Kodiak, Picnic, Camper, and Broot models have mount feet built into the base. Mounting these models prevents the bear from upending the bin, and reduces the damage a bear can do to the bin and other property (your house or car) and limits the possibility of your bin being stolen. The Kit and ToteBoxx have external mount feet that are attached to the base of the bin. The DockBoxx and ParcelBoxx have internal mount holes.

Q: How Do I Mount my Bin to a Concrete Pad?

A: The mount feet for the Bruin, Grizzly, and Kodiak models are built into the base of the bin, and are hidden from view. The mount feet are underneath the round swivel covers on top of the base on each corner. If possible, it's easiest to mount the base prior to assembly, but if not you will need to get inside of the bin to access the covers. Once the covers are swivelled to the side, it is easy to find the mounts. All you will need to do is mark the hole locations for drilling the lag bolts. You can even drill from the top of the base, but we suggest doing one bolt at a time to ensure that the holes do not drift, and all of the holes will line up with the mount holes. After tightening the bolts, you can slide the access covers back into position. For the Kit and ToteBoxx, the mounts are 2 external feet that are attached to each side of the base. Insert them as instructed, and then drill holes into the concrete where the holes are. The DockBoxx and ParcelBoxx models have mount holes built into the base (and back on the ParcelBoxxes).
